Appl. Environ. Microbiol. 61:2402-2407(1995).
-!-FUNCTION: Promotes colloidosmotic lysis by binding to the midgut epithelial cells of certain coleopteran and lepidopteran species.
Active on Plutella xylostella but not on Bombyx mori.
-!- DEVELOPMENTAL STAGE: The crystal protein is produced during sporulation and is accumulated both as an inclusion and as part c

"Bacillus thuringiensis cryet4 and cryet5 toxin genes and proteins toxic to legidopteran insects.";

Patent number US5322687, 21-JUN-1994.

-I- FUNCTION: Promotes colloidosmotic lysis by binding to the midgut epithellal cells of many lepidopteran larvae.

-i- FUNCTION: ATRAGE: The crystal protein is produced during sporulation and is accumulated both as an inclusion and as part o
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 the spore coat. MISCELLANEOUS: Toxic segment of the protein is located in the N-

Pesticidial crystal protein crylBc (Insecticidal delta-endotoxin
CrylB(c)) (Crystaline encomocidal protoxin) (140 kDa crystal protein)
Name=crylBc, Synonyms=crylB(c), crylBc,
Bacillus thuringiensis (subsp. morrison)).
                                                                                                       Gaps

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Sequence 42, 3

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        The present invention relates to novel insecticidal proteins obtained from Paccilomyces sp. (see AAB66899 to AAB66901 and AAB66913). The insecticidal proteins can be used to produce transgenic plants, which insect resistant. Also, the insecticidal proteins are useful for controlling insects by providing them at a locus where insects feed
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Novel insecticidal protein obtained from species of Paecilomyces for controlling insects, and for insect-resistant transgenic plant production.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            ;

amino

at the

protein comprising an X-glycine motif as an active ingredient of a pesticide.

```
The invention relates to insecticidal protein comprising an X-glycine motif at the amino-terminus. Polynucleotide or DNA constructs of the invention are useful for producing plants or plant parts that are resistant to insects. The protein or synergistic combination is useful as an active ingredient of a pesticide or for controlling insects. Antibodies raised to the insecticidal proteins can be used to identify other proteins with insecticidal activity. The present sequence is Bacillus thuringiensis insecticidal arrivity. The present sequence is sequence is used in the invention
                                                                                Claim 12; Page 47-50; 67pp; English
